## FOR IMMEDIATE RELEASE

# realKNX is certified and works with Google Assistant

*Press release*

Sophia Antipolis, France, Dec 4, 2017 — ProKNX's smart home server solution **realKNX** is now a **Google certified** application. The Google application a.k.a 'Action' work with the Google Assistant and the Google Home smart speakers. With the realKNX Google Action, users can control their KNX devices. It is possible to control lights, thermostats and scenes.

To control a KNX device, the user simply says "Ok Google, turn on the lights" or "Ok Google, set the thermostat to 22 degrees".

The Google Assistant speaks many languages amongst them English, French and German.

The realKNX Google Action, Alexa Skill and Siri voice command services are all included in the product price, there are no additional subscription fees.

**ProKNX SAS** is a start-up company specialized in Home Automation solutions based on the world-wide standard KNX. The **realKNX and proServ** product bundle is developed and marketed by ProKNX. The product is unique with its Plug and Play solution: its user interfaces, charts and voice services require no configuration. Additionally it includes augmented reality and graphical programming with Node-RED.

The **KNX standard guaranties** that all certified products work together.

The KNX Association has more than 400 KNX manufacturers in 42 countries and more than 71 000 KNX Partners in 161 countries. KNX provides solutions for all types of home and building automation, from dimmers to shutter control, from motion sensors to thermostats and much more.
