realKNX Air - 'No one will ever hear your voice but you'

realKNX Air - 'No one will ever hear your voice but you'

We're very proud to announce our latest product update **realKNX Air**. This release brings the next generation of **voice recognition**. It runs **directly on-device**, meaning no one will ever hear your voice but you.

We have worked with [Snips.ai](#) to integrate their cutting-edge technology. Snips provides Private-By-Design, Decentralised Voice Assistant Technology.

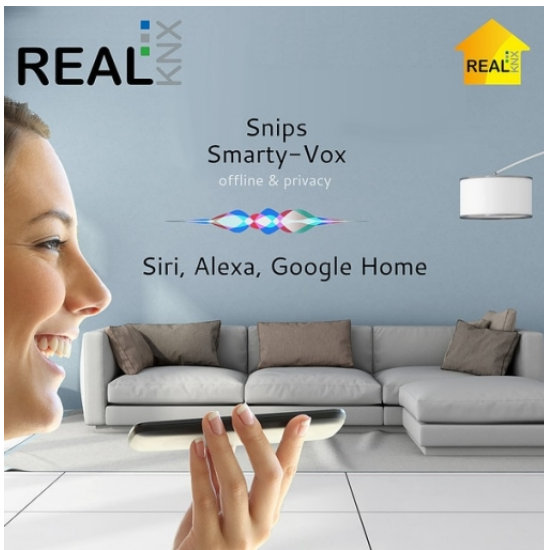

realKNX Air with Snips

realKNX Air is an evolution of previous releases of realKNX, i.e. you get all the features:

- HTML and app UI with **remote** connection via private url (myhome.proknx.xyz).
- **Plug & Play**: All configuration is done with ETS, realKNX loads room and device names in run-time.
- all UI is **automatically** generated, data logging is automatic, UI for scheduling is automatic.
- voice control with **Google Home, Amazon Alexa and Apple Siri**.
- remote control via Telegram Chat bot.
- **Node-RED** automation and integration: super easy to automate with graphical programming interface, endless 3rd party open source modules.
- **Augmented reality** (great help for people with disabilities)
